PROGRAMS

June 12

President Elect. **Bob Young** presented Idea for change of venue for Club's meetings to Woodland Community Center location with reduced selection of luncheon meals at lower price. Pros. And Con's were debated and the majority present seemed to be in favor of **Bob's** Idea. Board was to discuss and decide on when to proceed . August was probable so as to give Cracchiolos advance notice.

June 26

President Elect **Bob Young** Introduced an emergency procedure for filling in with a program when the speaker cancels out and or for giving club members more of a variety of subjects to share when they are responsible for getting a program. I remember back when **Bob** told us about his Air Force things from the Korean War. **Bob** demonstrated his idea by sharing his interest in the James Weber space telescope, with source materials off the web. From the material that **Bob** presented the telescope is expected to last for 25 years which is long enough for it to show the beginning of the universe. Meanwhile the Big Bang and galaxies occurring after it. We heard about Carbon Dioxide in plants that might support life. That it is scene in ultra red form only. About what is the cosmic dust and the billions of planets etc. in the universe. **Bob** mentioned that there was even some comedy programs
